Knives Ranch Classic Clipper: A Traditional Damascus Pocket Knife

The **Knives Ranch Classic Clipper** brings traditional pocket knife craftsmanship together with the beauty and performance of genuine Damascus steel. Designed for collectors, everyday carriers, and outdoor enthusiasts, this handmade Damascus pocket knife offers a classic slip joint design in a compact, practical package.

Its 2-5/8-inch blade is forged from **240 layers of 5160/4340 carbon steel Damascus**, creating a distinctive layered pattern on every blade. The steel is heat-treated in a vacuum furnace to provide dependable sharpness, durability, and strong edge retention. As a traditional slip joint pocket knife, the Classic Clipper uses spring tension rather than a locking mechanism, giving it the familiar operation associated with classic folding knives.

The **cattle bone handle** adds character and a comfortable grip, while polished **stainless steel bolsters** provide a refined finish and complement the Damascus blade. With a 3-1/2-inch closed length, it is easy to carry while still offering enough size for everyday cutting tasks and light outdoor chores.

Each knife comes with a **vegetable tanned leather belt pouch**, providing a convenient carrying option and adding to its traditional

aesthetic. The leather develops a natural patina over time, making the knife and sheath feel even more distinctive with continued use.

The Classic Clipper also makes an excellent **Damascus knife gift for him**. Whether given for a birthday, Father's Day, anniversary, or as a groomsmen gift, its handcrafted construction gives it a personal quality that mass-produced pocket knives simply cannot match.

With its genuine Damascus blade, cattle bone handle, stainless steel bolsters, and leather sheath, the **Knives Ranch Classic Clipper** is more than an everyday pocket knife. It is a traditional piece of craftsmanship designed to be carried, appreciated, and passed down.
